

A New Performance Standard for High-Bay Lighting

Delivers the highest lumens per dollar among competing LED high-bay luminaires

CREE QUALITY LUMINAIRE

100,000 HOURS DESIGNED LIFE

UNRIVALLED ENERGY SAVINGS

LOW GLARE UNIFORM LIGHT

10 YEAR WARRANTY

CXB Series High-Bay

Advanced Lighting Technologies are excited to offer one of Cree's latest LED creations, the CXB Series High-Bay. The CXB Series is no ordinary high-bay, delivering outstanding light, efficiency and durability. This cutting-edge design provides a long-life, low-maintenance lighting solution at an affordable price and boasts up to 80% energy savings over standard 400W high-bays when dimming control is implemented. Backed by a 10 year warranty, the CXB Series will not disappoint.

100,000+ Reasons Why It's No Ordinary High-Bay

With an exceptional lifetime, rated up to **100,000+ hours** with a zero-restrike time, the CXB Series is an ideal replacement for incumbent HID high-bay light sources. Additionally, it carries the benefits of a compact, lightweight construction, enhanced safety and significantly reduced re-lamp maintenance costs.

The CXB LED High-Bay luminaire offers unrivalled energy efficiency while still delivering a huge 25,700 lumens in distributions, designed for all types of general high-bay lighting.

Cutting Edge Design with Exceptional Payback at Less Than 3 Years

The CXB High Bay luminaire delivers 25,700 lumens with illumination performance that allows **one-for-one replacement** of 400W metal halide high-bay luminaires and multi-lamp fluorescent high-bay fixtures.

Bringing great performance and ongoing electricity cost savings to high-bay applications, the CXB Series makes obsolete the need to continue using energy-wasting, high-maintenance fluorescent and HID high-bay fixtures. The CXB Series is priced to enable payback at less than 3 years.

35% LOWER PROFILE *
50% LIGHTER WEIGHT

Construction & Materials

- Die-cast aluminium heat-sink
- Low-profile, lightweight design provides ease of installation
- Mounting choices of J-Box, pendant, hook and cord
- Accessory choices of wire guard, clear prismatic drop lens and clear cone bottom lens

Optical System

- 16" (406mm) aluminium
- 16" (406mm) clear acrylic
- 16" (406mm) white acrylic
- LED system delivers proper uniformity & spacing

Regulatory & Voluntary Qualifications

- IP54 rated driver
- IP65 rated LED optics
- ANZ compliance
